

Abdulkadir Shaikh

Navsari, 396445, Gujarat — +91 7434043381 — akadir22086@gmail.com — Abdulkadir Shaikh — GitHub — LinkedIn

Summary

Full Stack Developer with a track record of building scalable digital products. Expert in the MERN stack and Flutter, with a proven ability to take ideas from concept to production, evidenced by acquiring 500+ active users in 14 days for a recent launch. Currently researching advanced image compression algorithms for performance optimization.

Skills

Languages & Frameworks: JavaScript (ES6+), Java, MERN, Dart, Flutter.

Databases & Backend: MongoDB, MySQL, JWT, Bcrypt.

Tools & Cloud: Postman, Canva, Figma, Vercel, Firebase.

Core Competencies: System Design, DSA, RAG (AI) Models, UI/UX Design, Image Compression.

Professional Experience

Bloomr.world — Full-Stack Developer Intern

Dec 2025 – Apr 2026 (Expected)

- Collaborated with IIT alumni founders to develop and deploy scalable web solutions using the MERN stack.
- Mastered advanced Git/GitHub workflows, including complex branching strategies and team-based code reviews.
- Deployed core features to production with a focus on performance and maintainability.

Projects

Ramzaan Amaal Tracker (Flutter/Firebase)

Feb 2026

- Developed and launched a cross-platform habit tracker for Ramzaan using Flutter.
- Achieved **500+ active users within the first 14 days** of launch via organic growth.
- Implemented real-time progress tracking and a highly intuitive UI/UX, resulting in high user retention.

PULSE: Predictive Urban Lane Synchronization Ecosystem

March 2026

- Developed a computer-vision-assisted traffic management system for emergency vehicles.
- Integrated **YOLOv8n** for real-time vehicle density detection and implemented graph-based route optimization.
- Implemented a routing algorithm based on the research paper: *"Breaking the Sorting Barrier for Directed Single-Source Shortest Paths"*.

Civveo — Founder (MERN/Flutter)

Dec 2025 – Present

- Engineered a hyperlocal product discovery platform to bridge the gap between local vendors and customers.
- Won College **Sharktank 2024** (September) & Won College **Ideathon 2025** (March).
- Designed a high-concurrency database architecture using MongoDB to handle localized product search queries.

Bits — Habit Tracker & Security Research

March 2026

- Developed a specialized habit tracker following a reverse-engineering analysis of top-tier Play Store applications.
- Used the project as a case study to identify vulnerabilities in mobile app security, leading to deeper research into security.
- Born from a spark of inspiration, Bits is my latest personal project, officially launching on 8 April.

Education

Sanskar Smaruddhi School of Excellence

2022–2024

Uka Tarsadia University

2024–2028 (Expected)

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.2 / 10

Achievements & Interests

- **Achievements:** College Shark Tank Winner 2024, College Ideathon Runner-up 2025.
- **Research:** Actively researching image compression techniques to reduce payload size without quality loss.
- **Interests:** Creative Writing (Novelist), Sketching, and Physical Fitness (Clean Bulking).
